

Welcome back

Using Neighborhood Data in Aging Research

Report back, wrap-up, and resources

GSA Annual Scientific Meeting Online Workshop Series 2026, October 7, 2026

Where we are

Time (ET)	What we are doing	Who
12:00	Welcome and logistics	Philippa & Lindsay
12:05	What is NaNDA? Overview and repository tour	Lindsay & Philippa
12:30	NaNDA in action: examples from aging research	Philippa & Grace
12:55	Choose your breakout	Lindsay
1:00	Breakouts: beginner and intermediate	All
1:45	Reconvene and report back	Grace
1:55	Wrap-up and resources	Lindsay

Report back

About 10 minutes

BEGINNER

Choosing Your First NaNDA Dataset

Share one

The dataset you found for your own project, with its geography and years.

Or ask

Anything still unclear about tracts, ZCTAs, or geographic boundaries.

INTERMEDIATE

Linking NaNDA with Your Data

Share one

A snag you hit in the merge, and how you worked through it.

Or ask

Anything about identifiers, crosswalks, or linking your own data.

How to share

1

Raise your hand in Zoom, then unmute when called on.

2

Or type it in the chat. We will read some aloud.

**One sentence is plenty.
Questions count too.**

Questions? Put them in the Q&A, or unmute and ask.

What you practiced today

- Identify which NaNDA datasets fit your research question, by geographic level, years covered, and topic
- Link NaNDA to your own data using geographic identifiers, including when to use tract_fips10 or tract_fips20, and how ZIP codes differ from ZCTAs
- Frame a research question that combines neighborhood measures with your individual-level aging outcomes

Where to go from here

- **Get help**

- [NaNDA Office Hours](#): virtual, 1 to 2 PM ET. Next one is October 13.
- [NaNDA FAQs](#): choosing datasets, geographies, missing data
- [Email nanda-admin@umich.edu](mailto:nanda-admin@umich.edu)

- **Keep exploring**

- Your workshop materials, including the sample merge code. The link is in the chat.
- [NaNDA repository on ICPSR](#)
- Browse topics on the [NaNDA data page](#)
- [NaNDA's guide to geographies](#)

Cite the dataset you use

- Every NaNDA dataset has its own DOI. Include it in your citation.
- Cite each dataset you used, rather than NaNDA as a whole.
- Copy the ready-made citation from the dataset's page on ICPSR.
- More on citing in the [NaNDA FAQs](#)

**What's one thing
you learned today
that you can use
tomorrow?**

Thank you for
joining us!
